

1. Project Overview

A simple Kotlin Retail application designed as a digital storefront for the Shopistry Bakery Business. It offers a role-based platform where customers can login into their registered accounts, browse the bakery's catalogue & order deliveries of their chosen pastries & desserts, while admins can manage the shop's inventory & the information of each product.

2. Objectives & Scope

2.1. Objectives

- Provide a digital storefront for Shopistry customers to browse & transact with the business online.
- Provide a role based platform where admins can manage the store's inventory & product information remotely, and customers can create accounts to keep track of info, orders and interact with the Bakery.

2.2. Scope

Shopistry will cover:

- **Digital Storefront:** Browse items, view details & stock, add items to cart, place order & delivery. Filters: Sort by category, Sort by Price, Search by Name.
- **User Accounts:** Register, login, logout, customer & admin roles, set profile picture, edit profile info (name, email, password).
- **Admin Dashboard:** Add/Remove items, update stock count, modify item info (name, price, description, category, picture)

- **Cart System:** Add & remove items from cart, view items in cart, checkout & place order.
- **Modern GUI:** Minimalist Theme, Intuitive layout, responsive buttons and fields.

2.3. Out of Scope

- Digital Payment System (only Cash On Delivery available)
- Working order system (Current version features a mock Order System)

3. Release Plan

Release Version	Duration	Objectives
Release 1.0	Ongoing	To release a prototype for basic feature testing of Shopistry
Key Deliverables		
• Admin Dashboard Manage stock & item info. Add/remove items. • Customer Dashboard Browse bakery catalogue via scrollable grid. Details popup for each item when clicked. Add to cart/view cart buttons. Product search bar. Filter buttons: sort by price, sort by category. • Navigation Bar Navigate to Dashboard, navigate to Cart, navigate to Profile • Cart Page Display items in cart, remove items from cart, checkout & place order button. Payment method display (currently limited to Cash On Delivery). • Account Registration Input name, email & password. Checkbox to register account as Administrator. Input validation for email & password.		

- **Profile Page**

Displays account information, edit account information, set account Profile Picture.

- **Theme / UI**

Modern minimalist interface.

3.1. Deployment Environment

Staging:

- Run locally on developer devices or emulators on the IDE [Android Studio] for testing.
- GitHub repository for version control and code review.

Production:

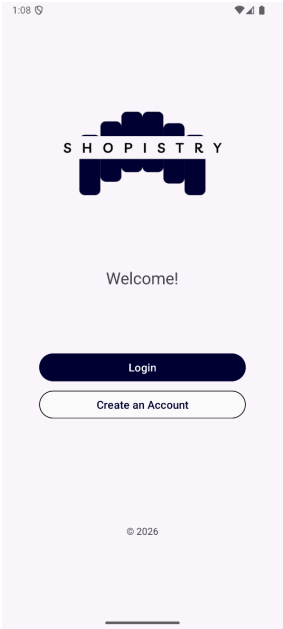

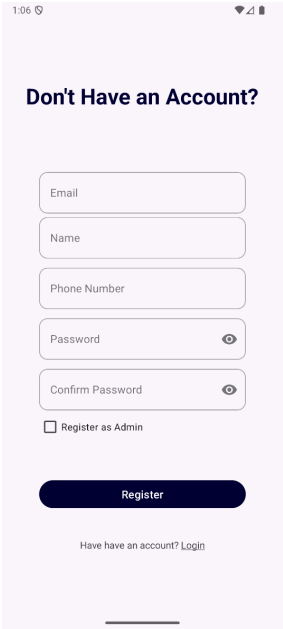

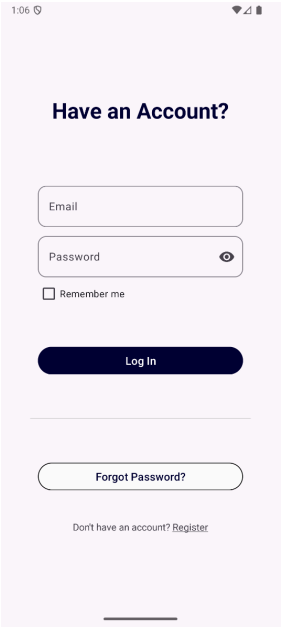

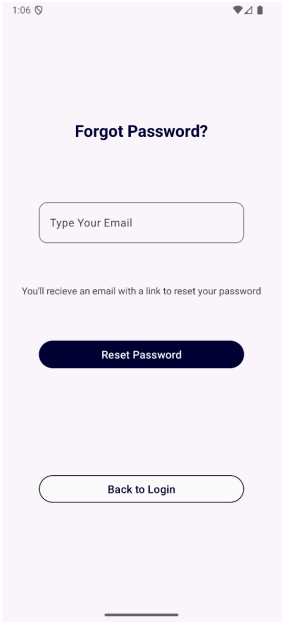

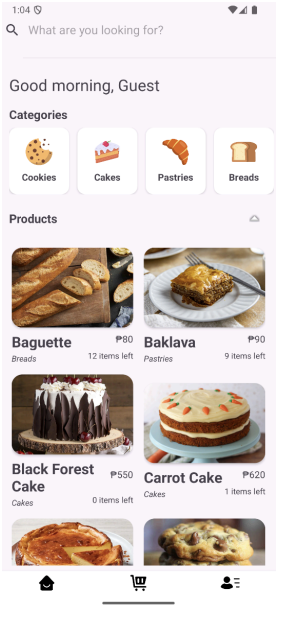

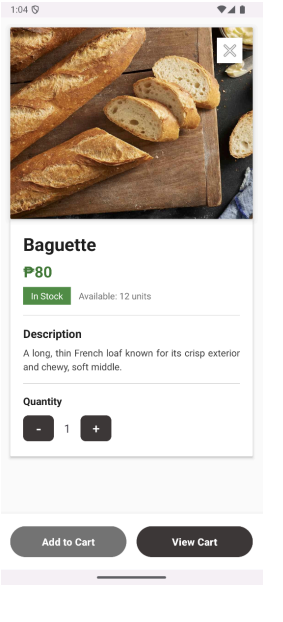

- Full packaged .apk installed directly from developer machine to user phone.
- Runs on Android Devices with SDK Version 36+, minimum SDK 33.
- Dependencies: Kotlin 2.3.20, Firebase

4. Environment & Dependencies

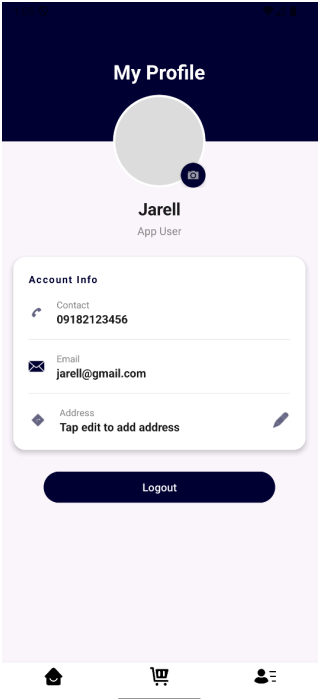

Category	Technology/Tool	Purpose
Environment	Kotlin version 2.3.20	Language used to develop the program
Frontend	XML View System	To design & generate the UI for the application
Backend	Firebase Realtime Database	To store & manage the application's database

Image Adapter	Glide	To process & display images in the application through links
User Authentication	FirebaseAuth	To manage user account creation and authentication
Project Management	Facebook Messenger	Task tracking & planning
Version Control	Github	For version control & organized collaborative development

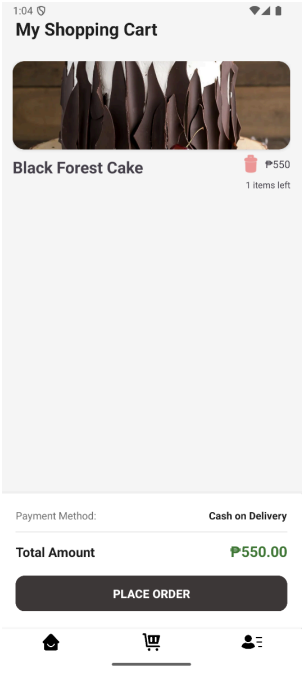

5. App Snapshots

Welcome Page	Register Page	Login Page
 The Welcome Page features the 'SHOPISTRY' logo at the top, a 'Welcome!' message, and two buttons: 'Login' and 'Create an Account'. The footer shows '© 2026'.	 The Register Page has the heading 'Don't Have an Account?'. It includes input fields for Email, Name, Phone Number, Password, and Confirm Password. There is a 'Remember me' checkbox, a 'Register as Admin' checkbox, and a 'Register' button. A link 'Have have an account? Login' is at the bottom.	 The Login Page has the heading 'Have an Account?'. It includes input fields for Email and Password, a 'Remember me' checkbox, and a 'Log In' button. A 'Forgot Password?' link is below the login section, and a 'Don't have an account? Register' link is at the bottom.
Forgot Password Page	Customer Dashboard	Detailed Product View
 The Forgot Password Page has the heading 'Forgot Password?'. It includes a 'Type Your Email' input field, a message 'You'll recieve an email with a link to reset your password', a 'Reset Password' button, and a 'Back to Login' link.	 The Customer Dashboard shows a search bar, a greeting 'Good morning, Guest', and 'Categories' (Cookies, Cakes, Pastries, Breads). It also displays 'Products' with images and prices: Baguette (P80, 12 items left), Baklava (P90, 9 items left), Black Forest Cake (P550, 0 items left), and Carrot Cake (P620, 1 items left). A bottom navigation bar is present.	 The Detailed Product View for 'Baguette' shows an image, price 'P80', 'In Stock' status, and 'Available: 12 units'. It includes a 'Description' and a 'Quantity' selector (set to 1). At the bottom are 'Add to Cart' and 'View Cart' buttons.

6. Summary / Conclusion

Shopistry App is a dedicated digital storefront and inventory management solution designed to streamline the connection between the Shopistry Bakery and its customers. Its minimalist interface, role-based access control, and real time synchronization through Firebase provide a seamless experience that bridges the gap between manual ordering and modern e-commerce convenience.

Through a robust XML-based View System and Kotlin integration, **Shopistry** ensures a responsive and intuitive environment for both administrators managing stock & customers browsing its catalogue. By leveraging Firebase for authentication and database management, the app provides a reliable, scalable foundation for future expansions, such as integrated payment systems and live order tracking, ultimately empowering the business to grow its digital presence with minimal technical overhead.
